INDEPENDENT AUDITORS' REPORT

To the Shareholders and Directors of Bank of The Bahamas Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of Bank of The Bahamas Limited and its subsidiaries ("the Bank"), which comprise the consolidated statement of financial position as at June 30, 2020, the consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended, and notes, including significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Bank as at June 30, 2020, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Bank in accordance with International Ethics Standards Board for Accountants International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Fax: +1 242 393 1772 Internet: www.kpmg.com.bs

Interest income \$41,685,999 (2019: \$36,321,639), see note 18)								
The risk	Our response							
Interest income is the Bank's primary source of revenues. The existence and accuracy of interest income are considered to be a key audit area due to the material financial impact of this account on the Bank's consolidated financial statements.	 In this area, our audit procedures included: Reviewing the internal controls and testing the key controls; Confirmation of principal balances and terms of interest bearing assets and vouching interest bearing assets to supporting documentation evidencing amounts, interest rates and payment terms; and Substantive analytical procedures and reperformance of the calculation of interest accruals to test the accuracy of interest income. 							

Application of IFRS 9 in the calculation of impairment of Loans and advances to customers \$68,262,712 (2019: \$61,505,934), see note 7)

The risk

On January 1, 2018 a new accounting standard for financial instruments ("IFRS 9") became effective, which requires impairment to be calculated based on expected credit losses ("ECLs"), rather than the incurred loss model previously applied under IAS 39. As at June 30, 2020, Loans comprise a major portion of the Group's assets.

Impairment of Loans was considered to be a key audit area primarily for the following reasons:

- IFRS 9 is a complex accounting standard which requires significant judgment to determine both the timing and measurement of impairment losses.
- The determination of expected credit loss allowances is highly subjective and judgmental.
 Small changes in key assumptions may result in material differences in the Bank's consolidated

Our response

In assessing the impairment losses on Loans, we performed the following procedures:

- Obtained an overall understanding of the Bank's methodology to determine the impairment allowance under the newly implemented IFRS 9.
- Obtained an understanding of the Bank's key credit processes and related controls, including granting, recording, monitoring and ECL provisioning.
- Assessed and tested key modeling assumptions used in the ECL model used by management to calculate the impairment allowance;
- Involved our internal specialists in testing the assumptions, inputs and formulas used in the ECL model. This included assessing the model's arithmetic accuracy and consistency with the requirements of IFRS 9.
- Tested the completeness and accuracy of key data inputs sourced from underlying systems that are applied in the

financial statements. Key judgments and estimates in respect of the timing and measurement of ECLs include:

- The interpretation of the requirements to determine impairment under IFRS 9, which are reflected in the Bank's ECL model:
- The identification of exposures with a significant deterioration in credit quality;
- The allocation of Loans to stages 1, 2 and 3 using criteria in accordance with IFRS 9;
- Modelling assumptions used to build the ECL model:
- Completeness and accuracy of data used to calculate the ECL; and
- Accuracy and adequacy of related financial statement disclosures.

- calculation of the impairment allowance. We tested the reconciliation of Loans between the underlying source systems and the ECL models.
- Recalculated the risk ratings for a sample of Loans to assess if they were appropriately allocated to the relevant stage, (i.e. stages 1, 2 and 3).
- As IFRS 9 was adopted at the start of the 2019 fiscal year, we evaluated related opening balances to gain assurance on the transition to IFRS 9. This included testing related adjustments and disclosures made on the transition in compliance with IFRSs.

Going concern assumption, see note 2(a)

The risk

These consolidated financial statements are prepared on a going concern basis, as the Bank's directors and management are satisfied that the Bank has the necessary financial resources to continue in business for the foreseeable future.

In making this assessment, the directors considered a range of information relating to present and future conditions, including projections of profitability, cash flows and capital requirements. As part of that assessment, the directors' also considered the impact to date, and the potential impact going forward, of the global COVID-19 pandemic on the Bank's operations. In their assessment, the directors' also took into account the fact that the Government, as majority shareholder, has confirmed its continuing financial support of the Bank for at least the next twelve months and, in fact, for the foreseeable future.

The directors' conclusion that the consolidated financial statements have been appropriately prepared using the going concern basis of accounting, and that adequate related disclosures have been made consolidated financial statements have been determined to be a key audit area because (i) the going concern assessment was significant considered to be a iudgement area that required significant audit effort; and (ii) of the

Our response

In this area, our audit procedures included:

- Evaluating the appropriateness of the directors' assessment of the Bank's ability to continue as a going concern for at least twelve months from the reporting date;
- Evaluating the appropriateness of the director's analysis of the impact of the COVID-19 pandemic, as reflected in the going concern assessment, on the Bank's operations, financial position, financial performance and cashflows to the date of the issue of the financial statements, and the potential impact for the foreseeable future;
- Evaluating management's strategic plan, as included in the going concern assessment, including its forecasts of the future outcome of events and conditions for the Bank and (i) evaluating the reliability of the underlying data generated to prepare the forecast; and (ii) determining whether there is adequate support for the assumptions underlying the forecast;
- Requesting written representations, where appropriate, from management regarding their plans for future action and evaluating the feasibility of these plans through our knowledge of the Bank and the banking industry;
- Obtaining a direct confirmation from the Government in relation to the financial support to the Bank to assess the financial support from the Government factored by the directors in the Bank's going concern assessment;
- Evaluating the ability of the Government to provide the financial support to the Bank as and when required, through our knowledge of the economy of the Bahamas and other relevant information;

material financial impact of the basis preparation on the Bank's consolidated financial statements. The considerations around the going concern assessment involve assumptions around projected profits, cash flows and changes in equity, which are affected by expected future economic conditions and, in particular, the extent of the impact of those conditions on net interest income and net fee income, level of deposits, asset prices, compliance with regulatory ratios and credit losses on exposures held by the Bank.

- Discussing the going concern assessment with the directors, to determine whether they have appropriately identified events or conditions that, individually or collectively, may cast significant doubt on the Bank's ability to continue as a going concern and, the directors' plans to address such events or conditions; and
- Evaluating the adequacy and appropriateness of the disclosures in the consolidated financial statements in relation to going concern, through our knowledge of the Bank and considering the results of our procedures on the going concern assumption.

Other information

We expect to receive other information from the Bank on November 16, 2020, which will comprise the information to be included in the Bank's annual report, but does not include the consolidated financial statements and our auditors' report thereon.

Our opinion on the consolidated financial statements does not and will not cover other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether there are indications that the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we determine that there is a material misstatement of this other information, we would be required to report that fact.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Bank to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is Lambert D. Longley.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

1. Corporate information

Bank of The Bahamas Limited (the "Bank"), is incorporated under the laws of The Commonwealth of The Bahamas, and is licensed by the Central Bank of the Bahamas to carry out banking business in The Bahamas under the provisions of the Banks and Trust Companies Regulations Act, 2000. The Bank is also licensed as an authorized dealer, pursuant to the Exchange Control Regulations Act, and is the holder of a broker dealer license from the Securities Commission of The Bahamas.

The Bank's shares are publicly traded and listed on The Bahamas International Securities Exchange. As at June 30, 2020 and 2019, The Government of the Commonwealth of The Bahamas (the "Government") and The National Insurance Board ("NIB") owned approximately 82.6% of the issued common shares. The remaining common shares are owned by approximately 3,000 Bahamian shareholders.

The Bank's head office is located at Claughton House, corner of Shirley Street and Charlotte Street, Nassau, The Bahamas. The registered office is located at Sassoon House, corner of Shirley Street and Victoria Avenue, Nassau, The Bahamas.

The Bank's services include the provision of commercial and retail banking services, private banking and the issuance of Visa branded stored value, prepaid and credit cards. The Bank is an agent for American Express. Prior to October 31, 2019, the Bank also provided trust services (Note 26), As at June 30, 2020, the Bank had twelve branches (2019: twelve): four in New Providence, one in Grand Bahama, two in Andros, one in San Salvador, one in Inagua, one in Cat Island, one in Eleuthera, and one in Bimini.

2. Basis of preparation

The Bank's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). This is the first set of the Bank's annual consolidated financial statements in which *IFRS 16 Leases* has been applied. Changes to significant accounting policies are described in Note 2(d).

These consolidated financial statements are presented in Bahamian Dollars, which is the Bank's functional currency. All amounts have been rounded to the nearest dollar, except when otherwise indicated.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

2. Basis of preparation (continued)

The preparation of the consolidated financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Bank's accounting policies. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 3.

(a) Going concern

These consolidated financial statements are prepared on a going concern basis, as the Bank's directors and management are satisfied that the Bank have the resources to continue in business for the foreseeable future. In making this assessment, a range of information relating to present and future conditions have been considered, including projections of profitability, cash flows and capital requirements. These considerations include the impact that the global COVID-19 pandemic has had, and continue to have, on the Bank's operations.

In March 2020, the World Health Organization declared a global pandemic due to COVID-19. This pandemic has affected the Bank's operations during the last quarter of the fiscal year and subsequent to that period. The restrictions imposed by the Government on certain businesses, national events and activities, the periods of community lockdown and curfew, the significant increase in unemployment and the historic decline in tourism severely reduced the economic activities of the Bank, the Bank's customers, the industry and the country, as a whole, and required the Bank to continuously adjust to the diverse challenges posed by the impact of this pandemic. These also negatively impacted the Bank's impairment and credit loss expenses for the year. Without the significant increases in impairment and credit loss expense due to COVID-19 the Bank would have recorded net income for the year.

The Bank experienced significant operating losses for several years prior to the fiscal year ended June 30, 2018 and has an accumulated deficit as at June 30, 2020 of \$144,089,189 (2019: \$136,362,716). Notwithstanding the uncertainties surrounding COVID-19 and the losses incurred to date, management is satisfied that it has implemented a strategic plan to sustain the operations and financial viability of the Bank and to support its continuing ability to operate as a going concern.

The Government, as majority shareholder, has confirmed that it fully supports the Bank when circumstances necessitate the need for the Bank to receive financial support to ensure that it is able to continue to operate as a going concern, and remains firmly committed to supporting the continuing operations of the Bank, including the implementation of the Bank's strategic plan, and will ensure that adequate resources are provided to enable the Bank to satisfy its financial obligations for at least the next twelve months and, in fact, for the foreseeable future.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

2. Basis of preparation (continued)

(b) Basis of consolidation

The consolidated financial statements comprise the financial statements of the Bank and its subsidiaries (Note 31) as at June 30, 2020 and 2019. 'Subsidiaries' are entities controlled by the Bank. The Bank 'controls' an entity if it is exposed to, or has rights, to variable returns from its involvement with the entity investee and has the ability to affect those returns through its power over the investee. Specifically, the Bank controls an investee if and only if the Bank has:

- power over the investee, namely, existing rights that give it the current ability to direct the relevant activities of the investee
- exposure, or rights, to variable returns from its involvement with the investee, and
- the ability to use its power over the investee to affect its returns

When the Bank has less than a majority of the voting or similar rights of an investee, the Bank considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- the contractual arrangement with the other vote holders of the investee
- rights arising from other contractual arrangements
- the Bank's voting rights and potential voting rights

The Bank re-assesses whether it has control if there are changes to one or more of the elements of control. Consolidation of a subsidiary begins when the Bank obtains control over the subsidiary and ceases when the Bank loses control of the subsidiary. All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between the Bank and its subsidiaries are eliminated in full on consolidation.

When the bank loses control over a subsidiary, it derecognizes the assets and liabilities of the subsidiary, and any Non-Controlling Interest (NCI) and other components of equity.

Any resulting gain or loss is recognized in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

(c) New standards, amendments and interpretations

In these consolidated financial statements, the Bank has applied *IFRS 16 Leases* for the first time. The nature and effect of the changes as a result of adoption of this new accounting standard are described below in Note 2 (d).

Standards, amendments and interpretations issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's financial statements are disclosed below. The Bank intends to adopt these standards, if applicable, when they become effective.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

2. Basis of preparation (continued)

(c) New standards, amendments and interpretations

IFRS 17 Insurance contracts

In May 2017, the IASB issued IFRS 17 *Insurance Contracts* (IFRS 17), a comprehensive new accounting standard for insurance contracts, covering recognition and measurement, presentation and disclosure. Once effective, IFRS 17 will replace IFRS 4 *Insurance Contracts* (IFRS 4). IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. IFRS 17 is effective for reporting periods beginning on or after 1 January 2021, with comparative figures required. The Bank has not yet assessed the full impact of adopting IFRS 17, but anticipates that it will not be applicable to the Bank.

Amendments to IFRS 3: Definition of a Business

In October 2018, the IASB issued amendments to the definition of a business in IFRS 3 Business Combinations to help entities determine whether an acquired set of activities and assets is a business or not. They clarify the minimum requirements for a business, remove the assessment of whether market participants are capable of replacing any missing elements, add guidance to help entities assess whether an acquired process is substantive, narrow the definitions of a business and of outputs, and introduce an optional fair value concentration test. New illustrative examples were provided along with the amendments. Since the amendments apply prospectively to transactions or other events that occur on or after the date of first application, the Bank will not be affected by these amendments on the date of transition.

Amendments to IAS 1 and IAS 8: Definition of Material

In October 2018, the IASB issued amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to align the definition of 'material' across the standards and to clarify certain aspects of the definition. The new definition states that, 'Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.' The amendments to the definition of material are not expected to have a significant impact on the Bank's consolidated financial statements.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

2. Basis of preparation (continued)

(d) Changes in significant accounting policies

IFRS 16 supersedes IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to recognize most leases on the balance sheet.

Lessor accounting under IFRS 16 is substantially unchanged from IAS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in IAS 17.

As the lessee, the Bank adopted IFRS 16 using the modified retrospective method of adoption with the date of initial application of July 1, 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application. The Bank elected to use the transition practical expedient to not reassess whether a contract is or contains a lease at July 1, 2019. Instead, the Bank applied the standard only to contracts that were previously identified as leases applying IAS 17 and IFRIC 4 at the date of initial application.

The Bank has lease contracts for various branches and back offices. Before the adoption of IFRS 16, the Bank classified each of its leases (as lessee) at the inception date as an operating lease. Upon adoption of IFRS 16, the Bank applied a single recognition and measurement approach for all leases except for short-term and low-value leases. The standard provides specific transition requirements and practical expedients, which have been applied by the Bank.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

2. Basis of preparation (continued)

(d) Changes in significant accounting policies (continued)

Leases previously accounted for as operating leases

The Bank recognised right-of-use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases and leases of low-value assets. The right-of-use assets for most leases were recognised based on the carrying amount as if the standard had always been applied, apart from the use of incremental borrowing rate at the date of initial application. In some leases, the right-of-use assets were recognised based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognised. Lease liabilities were recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate of 4% at the date of initial application.

The Bank also applied the available practical expedients wherein it:

- Used a single discount rate to a portfolio of leases with reasonably similar characteristics.
- Relied on its assessment of whether leases are onerous immediately before the date of initial application.
- Applied the short-term leases exemption to leases with lease term that ends within 12 months of the date of initial application.
- Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application.
- Used hindsight in determining the lease term where the contract contained options to extend or terminate the lease.

Based on the above, as at July 1, 2019, with the adoption of IFRS 16, the Bank recognized right-of-use of assets and lease liabilities, with the difference of \$423,267 recognized against the Bank's retained earnings as at July 1, 2019.

The reconciliation of the Bank's Right-of-use assets and Lease liabilities are as follows:

	Righ	t-of-use assets	Lea	ase liabilities
July 1, 2019	\$	3,977,323	\$	4,400,590
Net increase		1,008,524		984,100
Depreciation expense		(1,152,607)		-
Interest expense		-		67,044
Actual lease paid		-		(1,378,096)
June 30, 2020	\$	3,833,240	\$	4,073,638

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

3. Critical accounting judgments and key sources of estimation uncertainty

Certain amounts included in or affecting the consolidated financial statements and related disclosures must be estimated, requiring management to make assumptions with respect to values or conditions that cannot be known with certainty at the time the consolidated financial statements are prepared. A "critical accounting estimate" is one that is both important to the presentation of the Bank's financial position and results of operations and requires management's most difficult, subjective or complex judgments, often because of the need to make estimates about the effect of matters that are inherently uncertain.

There were no changes to the critical accounting estimates and judgements during the year, except as discussed below. However, the level of estimation uncertainty and judgement for the calculation of expected credit losses ("ECL") has increased as a result of the economic effects of the COVID-19 outbreak.

Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets and liabilities affected in future periods.

Management evaluates such estimates on an ongoing basis based upon historical results and experience, consultation with experts, trends and other methods considered reasonable in the particular circumstances.

Classification of financial assets

Assessment of the business model within which the assets are held and assessment is made as to whether the contractual terms of a financial asset are solely payment of principal and interest ("SPPI") on the principal amount outstanding.

Impairment of financial assets

The allowance for loan impairment represents management's estimate of an asset's expected credit loss ("ECL").

The measurement of the ECL allowance for financial assets is an area that requires the use of complex models and significant assumptions about the future economic conditions and credit behavior (e.g. the likelihood of customers defaulting and the resulting losses).

ECL is defined as the weighted expected probable value of the discounted credit loss (principal and interest) determined by evaluating a range of possible outcomes and future economic conditions. It represents the present value of the difference between the contractual cash flows and the expected cash flows (including principal and interest).

The process for determining the allowance involves significant quantitative and qualitative assessments. Particularly, a number of significant judgments is also required in applying the accounting requirements for measuring ECL, such as:

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

3. Critical accounting judgments and key sources of estimation uncertainty (continued)

Impairment of financial assets (continued)

- i. Determining criteria for significant increase in credit risk;
- ii. Choosing appropriate models and assumptions for the measurement of ECL;
- iii. Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated ECL;
- iv. Assessing the risk rating and impaired status of loans;
- v. Estimating cash flows and realisable collateral values;
- vi. Developing default and loss rates based on historical data;
- vii. Estimating the impact on this historical data by changes in policies, processes and credit strategies;
- viii. Assessing the current credit quality based on credit quality trends; and
- ix. Determining the current position in the economic cycle.

Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is further detailed in Note 30.

Property and equipment

Property and equipment are tested for impairment when circumstances indicate there may be a potential impairment. Changes in circumstances and management's evaluations and assumptions may give rise to impairment losses in the relevant future periods. During the year ended June 30, 2020, the Bank recognized impairment losses of Nil (2019: Nil).

Depreciation and amortisation

Depreciation and amortisation are based on management estimates of the future useful lives of property and equipment and intangible assets. Estimates may change due to technological developments, competition, changes in market conditions and other factors and may result in changes in the estimated useful lives and in the amortisation or depreciation charges. The Bank reviews the future useful lives of property and equipment and intangible assets periodically taking into consideration the factors mentioned above and all other important factors.

Estimated useful lives for similar types of assets may vary due to factors such as growth rate, maturity of the market, history and expectations for replacements or transfer of assets, and climate, among others. In case of significant changes in the estimated useful lives, depreciation and amortisation charges are adjusted prospectively.

Fair value of financial instruments

IFRS 13 requires that the classification of financial instruments at fair value be determined by reference to the source of inputs used to derive the fair value. This classification uses three-level hierarchy as discussed in Note 28.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

3. Critical accounting judgments and key sources of estimation uncertainty (continued)

Recognition and measurement of provisions and contingencies

Management uses key assumptions about the likelihood and magnitude of an outflow of resources to determine adequate provisions or disclosures in the consolidated financial statements.

Valuation of investment property

The Bank carries its investment property at fair value, with changes in fair value being recognized in the consolidated statement of comprehensive income. The Bank assesses the fair value of its investment property through the use of independent valuation specialists on a periodic basis, performing management assessments in the intervening years. Investment property was valued by reference to market-based evidence, using comparable prices adjusted for specific market factors such as nature, location, and the condition of the respective property. Key assumptions used to determine the fair value of the investment property are discussed in Note 8.

Change in Accounting Estimate on Deferred Loan Fees

Commitment fees received to originate a loan or fees that are an integral part of the effective interest rate of a financial instrument, together with the related transaction costs, are deferred and recognised as an adjustment of the effective interest rate. Management previously amortised the loan commitment fees using manual Excel-based effective interest rate method over the estimated average loan terms of the related portfolio basis. During the year, the Bank implemented certain automated processes that allowed for more accuracy in calculating deferred fees, and this change in accounting estimate resulted in the recognition of an additional \$3.3 million of interest income.

4. Summary of significant accounting policies

(a) Revenue and expense recognition

Interest income and expense are recognised in the consolidated statement of comprehensive income using the effective interest method. The 'effective interest method' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- The gross carrying amount of the financial asset; or
- The amortised cost of the financial liability.

The calculation of the effective interest rate includes transaction costs and fees received that are an integral part of the effective interest rate. The effective interest rate of a financial asset or financial liability is calculated on initial recognition of a financial asset or financial liability. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(a) Revenue and expense recognition (continued)

Fee and commission income and expense that are integral to the effective interest rate on a financial asset or financial liability are included in the effective interest rate. Other fee and commission income is recognized as the related services are performed. Other fee and commission expenses relate mainly to transaction and service fees, which are expensed as the services are received.

(b) Cash and cash equivalents

For purposes of the consolidated statement of cash flows, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including cash with The Central Bank of The Bahamas, amounts due from banks, and short-term treasury bills.

(c) Financial instruments

Recognition and initial measurement

The Bank initially recognizes loans and advances and deposits on the date on which they are originated. All other financial instruments (including regular-way purchases and sales of financial assets) are recognised on the trade date, which is the date on which the Bank becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is measured initially at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue.

Classification

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost, fair value through other comprehensive income ("FVOCI") or fair value through profit or loss ("FVTPL").

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(c) Financial instruments (continued)

Classification (continued)

Financial assets (continued)

On initial recognition of an equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Business model assessment

The Bank makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Bank's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and its strategy for how those risks are managed;
- how managers of the business are compensated (e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected); and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Bank's stated objective for managing the financial assets is achieved and how cash flows are realised.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(c) Financial instruments (continued)

Assessment of whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are SPPI, the Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making the assessment, the Bank considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Bank's claim to cash flows from specified assets (e.g. non-recourse loans); and
- features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

The Bank holds a portfolio of long-term fixed-rate loans for which the Bank has the option to revise the interest rate at periodic reset dates. These reset rights are limited to the market rate at the time of revision. The borrowers have an option to either accept the revised rate or redeem the loan at par without penalty. The Bank has determined that the contractual cash flows of these loans are SPPI because the option varies the interest rate in a way that is consideration for the time value of money, credit risk, other basic lending risks and costs associated with the principal amount outstanding.

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Bank changes its business model for managing financial assets.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(c) Financial instruments (continued)

Modification

If the terms of a financial asset are modified, the Bank evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised and a new financial asset is recognised at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of the eligible transaction costs are included in the initial measurement of the asset; and
- other fees are included in profit or loss as part of the gain or loss on derecognition.

If cash flows are modified when the borrower is in financial difficulties, then the objective of the modification is usually to maximize recovery of the original contractual terms rather than to originate a new asset with substantially different terms. If the Bank plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it first considers whether a portion of the asset should be written off before the modification takes place. This approach impacts the result of quantitative evaluation and means that the derecognition criteria are usually not met in such cases.

(d) Impairment of financial assets

The Bank recognises loss allowance for ECL on financial assets measured at amortised cost and measures impairment losses at amount equal to 12-month ECL or lifetime ECL, depending on the stage in which the asset is classified. Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial asset. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over which the Bank is exposed to credit risk.

Impairment of financial assets is recognised in three stages:

- Stage 1 When a financial asset is originated, ECLs resulting from default events that are possible within the next 12 months are recognised and a loss allowance is established. On subsequent reporting dates, 12-month ECL also applies to existing financial assets with no significant increase in credit risk since their initial recognition.
- Stage 2 If the credit quality subsequently significantly deteriorates for a particular portfolio or transaction, the Bank recognises the full lifetime expected credit losses.
- **Stage 3** At a later date, once one or more default events have occurred on the transaction or on a counterparty resulting in an adverse effect on the estimated future cash flows, the Bank recognises the full lifetime expected credit losses. At this stage, the financial asset is credit-impaired.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(d) Impairment of financial assets (continued)

In determining whether a significant increase in credit risk has occurred since initial recognition, and when estimating ECLs, the Bank considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Bank's historical experience and informed credit assessment and forward-looking information.

The assessment of whether an asset is in stage 1 or 2 considers the relative change in the probability of default occurring over the expected life of the instrument and is not assessed based on the change in the amount of the expected credit losses. This involves setting quantitative tests combined with additional indicators such as credit risk classification and other observable inputs. Assets that are more than 30 days past due, but not credit-impaired, are classed as Stage 2.

Changes in credit loss, including the impact of movements between the first stage (12 month expected credit losses) and the second stage (lifetime expected credit losses), are recorded in the consolidated statement of profit or loss.

IFRS 9 requires the use of more forward-looking information including reasonable and supportable forecasts of future economic conditions. The requirement to consider a range of economic scenarios and their possible impact on impairment allowances is a subjective feature of the IFRS 9 ECL model. The Bank continues to develop its capability to model a number of economic scenarios and capture the impact on credit losses to ensure the overall ECL represents a reasonable distribution of economic outcomes.

The application of IFRS 9 does not alter the current definition of default currently used to determine whether or not there is objective evidence of impairment of a financial asset.

The Bank considers a financial asset to be in default when:

- The borrower is unlikely to pay its credit obligations to the Bank in full, without recourse by the Bank through actions such as realising security (if any held);
- The financial asset is more than 90 days past due; or
- The borrower is on principal only repayment terms.

Impairment losses for financial assets measured at amortised cost are deducted from the gross carrying amount of assets.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(d) Impairment of financial assets (continued)

Write-off of loans and advances

A loan (and the related impairment allowance account) is normally written off, either partially or in full, when there is no realistic prospect of recovery of the principal amount and, for a collateralised loan, when the proceeds from realising the security have been received. Consumer installment and credit card loans are written-off after principal and/or interest payments become 270 days and 180 days contractually in arrears, respectively.

Recovery of previously written-off loans

Recoveries of principal and/or interest on previously written off loans are recognised in provisions for credit losses, net in the consolidated statement of profit or loss and other comprehensive income on a cash basis or when the loan is rewritten on normal terms prevailing at the time of the rewrite.

Renegotiated loans

Loans subject to impairment assessment, whose terms have been renegotiated, are subject to ongoing review to determine whether they remain impaired or should be considered past due. The carrying amount of loans that have been classified as renegotiated retain this classification until maturity or derecognition.

(e) Derecognition of financial assets and financial liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The contractual rights to receive cash flows from the financial asset have expired; or
- The Bank has transferred its rights to receive the contractual cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either:
 - The Bank has transferred substantially all the risks and rewards of ownership of the financial asset, or
 - The Bank has neither transferred nor retained substantially all the risks and rewards of ownership and it does not retain control of the financial asset.

When the Bank has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all of the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Bank's continuing involvement in the asset. In that case, the Bank also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Bank has retained. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Bank could be required to repay.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(e) Derecognition of financial assets and financial liabilities (continued)

Financial assets (continued)

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognized) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognized in OCI is recognized in profit and loss.

Financial liabilities

A financial liability is derecognised when its contractual obligations are discharged or cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

(f) Foreign currency

The reporting and functional currency of the Bank is the Bahamian dollar (B\$). Transactions in foreign currencies are converted to B\$ at the rates of exchange prevailing at the dates of the transactions.

Foreign currency monetary assets and liabilities are converted to B\$ at rates of exchange prevailing on the reporting date. The foreign currency gain or loss on monetary items is the difference between the amortised cost in the functional currency at the beginning of the year, adjusted for effective interest and payments during the year, and the amortised cost in the foreign currency translated at the spot exchange rate at the end of the year. Realized and unrealized foreign exchange gains and losses are included in the consolidated statement of comprehensive income.

Non-monetary assets and liabilities denominated in foreign currencies that are stated at historical cost or amortised cost are recorded at the exchange rates ruling at the dates of transaction.

(g) Property and equipment

Items of property and equipment (excluding the building) are stated at historical cost less accumulated depreciation and any accumulated impairment losses. The building is stated at cost less accumulated depreciation. Historical costs include expenditure that is directly attributable to the acquisition of the items. Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(g) Property and equipment (continued)

Subsequent costs are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. Repairs and maintenance are charged to the consolidated statement of comprehensive income during the financial period in which they are incurred.

Any gain or loss on disposal of an item of property and equipment is recognized within the consolidated statement of comprehensive income.

Depreciation and amortisation are calculated using the straight-line method to write down the cost of property and equipment less their estimated residual values using the straight-line method over their estimated useful lives and is generally recognized in the consolidated statement of comprehensive income. The estimated useful lives are as follows:

Building 50 years Leasehold improvements 3-5 years Furniture, fixtures and equipment 3-10 years

Leasehold improvements are amortised over the shorter of the economic useful life of the asset or the lease term and taking into consideration any extension of the lease term if there is reasonable expectation of renewal. The amortisation term, however, does not exceed five years. Land is not depreciated.

Property and equipment are derecognised on disposal or when no future economic benefits are expected from their use. Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the consolidated statement of comprehensive income.

(h) Impairment of non-financial assets

At each reporting date, the Bank reviews the carrying amount of non-financial assets to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(h) Impairment of non-financial assets (continued)

The 'recoverable amount' is the greater of an asset's fair value less costs to sell and value in use. 'Value in use' is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For impairment testing, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

(i) Provisions

Provisions are recognised when the Bank has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Bank expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the consolidated statement of comprehensive income net of any reimbursement.

(j) Related parties

Related parties include all Ministries and Departments of the Government, Government Corporations, Subsidiaries and Agencies as well as directors and key management personnel of the Bank. All transactions with related parties are based on rates and terms used in the normal course of business, except for reduced rates for borrowings by the Bank's personnel.

(k) Employee benefits

The Bank operates a defined contribution plan (the "Plan") where the Bank pays fixed contributions into a separate entity. The Bank has no legal or constructive payment obligations once contributions have been paid. The Plan's costs are charged to general and administrative expenses and are funded as accrued.

The Bank operates an Employee Share Ownership Plan ("ESOP") where the Bank matches employees' share purchases up to 25%. The matching contributions vest over 5 years. The costs of the ESOP are charged to general administrative expenses.

(l) Earnings/(Loss) per share

Basic earnings/(loss) per share is computed by dividing the net income/(loss) attributable to common shareholders by the weighted average number of shares outstanding during the year.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(m) Fiduciary activities

The Bank acts as trustee and in other fiduciary capacities that result in the holding or placing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions. These assets and income arising thereon are excluded from these consolidated financial statements, as they are not assets of the Bank.

(n) Taxes

Effective January 1, 2015, the Government implemented a value-added tax ("VAT") in the Commonwealth of The Bahamas. VAT is a broad-based consumption tax that would be applied to most goods and services bought locally or imported into the country. The standard rate for VAT is12%, charged on all goods and services that are not zero-rated or exempt. Under the VAT Act, all VAT registrants, among other things, must maintain proper accounts and records, file accurate and timely VAT returns, and remit the net VAT collected (output minus input VAT) to the government within the stipulated deadlines. The Bank is a VAT registrant and has remitted all VAT collected during the year to the Government within the stipulated deadlines.

(o) Investment property

Investment property is initially measured at cost including transaction costs and subsequently at fair value based on an appraisal by a local real estate appraiser. Additions to investment property are also recorded at cost. On an annual basis, the investment property is assessed for impairment with gains and losses arising from changes in the fair value of the investment property included in the consolidated statement of comprehensive income for the period in which they arise. The impairment assessment is based on fair values as determined by an independent appraisal performed every three years, and as determined by management in intervening years.

Any gain or loss on disposal of investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognized in the consolidated statement of comprehensive income or loss.

When the use of property changes such that it is reclassified as Property and Equipment, its fair value at the date of classification becomes its cost of subsequent accounting.

(p) Computer software

Acquired computer software costs and licenses are capitalized based on the costs incurred to acquire and bring to use the specific software. These costs are amortised using the straight-line basis of accounting over the expected useful life. Software has expected useful life of 5 to 10 years.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(q) Borrowings

Borrowings are recognised initially at fair value net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between proceeds net of transaction costs and the redemption value is recognised in the consolidated statement of comprehensive income over the period of the borrowings using the effective interest method.

(r) Share capital

(i) Share issue costs

Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction from the proceeds.

(ii) Dividends on shares

Dividends on common and preferred shares are recognised in equity in the period in which they are approved by the Bank's Directors and Regulator.

(iii) Treasury shares

Where the Bank has purchased its own equity share capital, the consideration paid is deducted from total shareholders' equity as treasury shares until they are cancelled. Where such shares are subsequently sold or reissued, any consideration received is included in shareholders' equity.

(s) Leases

Policy applicable before July 1, 2019:

Operating lease payments are recognised as an expense on a straight-line basis over the lease term and included in 'operating expenses' in the consolidated statement of comprehensive income.

Policy applicable as of July 1, 2019:

Bank as a lessee

The Bank applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Bank recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Bank recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

4. Summary of significant accounting policies (continued)

(s) Leases (continued)

Policy applicable as of July 1, 2019 (continued):

Lease liabilities

At the commencement date of the lease, the Bank recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivable), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Bank and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses in the period in which the event or condition that triggers the payment occurs.

(t) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. As at June 30, 2019 and 2018, there was no master netting agreements outstanding. Therefore, any related assets and liabilities are presented gross in the consolidated statement of financial position.

(u) Financial guarantees

'Financial guarantees' are contracts that require the Bank to make specified payments to reimburse the holder for a loss that it incurs because a specified debtor fails to make payment when it is due in accordance with the terms of a debt instrument. In the ordinary course of business, the Bank gives financial guarantees, consisting of letters of credit, guarantees and acceptances. Financial guarantees are initially recognised in the consolidated financial statements (within 'Other liabilities') at fair value, being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amount initially recognised less, when appropriate, cumulative amortisation recognised in the consolidated statement of comprehensive income, and the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee.

Any increase in the liability relating to financial guarantees is recorded in the consolidated statement of comprehensive income. The premium received is recognised in the consolidated statement of comprehensive income in 'Net fees and commission income' on a straight-line basis over the life of the guarantee.

Notes to Consolidated Financial Statements

5. Cash and cash equivalents

	2020	2019
Cash	\$ 19,339,409 \$	13,438,650
Deposits with the Central Bank non-interest		
bearing (Note 24)	92,466,235	56,085,520
Cash and account with the Central Bank	111,805,644	69,524,170
Cash equivalents - Treasury Bills (Note 24)	44,935,963	49,917,360
Due from banks (Note 2)	49,370,314	61,686,033
Cash, cash equivalents and due from banks (Note 30)	206,111,921	181,127,563
Less: mandatory reserve deposits with the Central Bank	25,377,090	23,647,690
Cash and cash equivalents	\$ 180,734,831 \$	157,479,873

The statutory reserve account with The Central Bank of The Bahamas ("the Central Bank") of \$25,377,090 (2019: \$23,647,690) is not included in cash and cash equivalents. Mandatory reserve deposits represent the Bank's regulatory requirement to maintain a percentage of deposit liabilities as cash or deposits with the Central Bank. These funds are not available to finance the Bank's day-to-day operations. All balances with The Central Bank of The Bahamas are non-interest bearing. Government issued Treasury Bills have maturity dates extending through to September 2020 (2019: September 2019). Money market placements included in Due from banks amount to \$2,410,615, net of \$33,088 allowance for impairment losses (Note 21) (2019: Nil).

6. Investment securities, net

Investment securities comprise equity and debt securities classified into the following categories:

	FVOCI	Amortised cost	Total
Bahamas Registered Stock (Note 24)	\$ -	\$ 47,957,388 \$	47,957,388
Equity Securities	3,044,359	-	3,044,359
Allowance for impairment loss (Notes 21, 30)	-	(1,486,448)	(1,486,448)
At June 30, 2020	\$ 3,044,359	\$ 46,470,940 \$	49,515,299

	FVOCI	Amortised cost	Total
Bahamas Registered Stock (Note 24)	\$ -	\$ 98,101,320 \$	98,101,320
Equity Securities	2,735,148	-	2,735,148
Allowance for impairment loss (Note 30)	-	(26,500)	(26,500)
At June 30, 2019	\$ 2,735,148	\$ 98,074,820 \$	100,809,968

As at year end, government securities mainly comprise Bahamas Registered Stock which are variable rate bonds tied to the Bahamian \$ Prime Rate issued by The Bahamas Government with interest rates ranging from 2.54% to 5.65% per annum (2019: from 2.39% to 4.81% per annum) and scheduled maturities between 2020 and 2049 (2019: between 2019 and 2035).

As at June 30, 2020, the allowance for impairment loss significantly increased as the ECL estimates and assumptions considered the impact of the COVID-19 pandemic. Management used its judgement in the assessment of significant increase in risk and migration of balances to progressive stages as exposures on government securities deteriorated from Stage 1 to Stage 2 at higher PD (Note 30).

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

8. Investment property

Investment Property comprises of land owned by the Bank. The land is located on West Bay Street, Nassau Bahamas.

During the current year, the Bank engaged the services of an independent real estate and valuation expert who holds a recognised and relevant professional qualification and who has recent experience in the location and category of the investment property being valued. The fair value of the investment property of \$6,463,000 as at June 30, 2020 is based on the independent valuation (2019: \$6,463,000 based on an appraisal that was performed in June 2017).

The appraisal has been prepared during the COVID-19 pandemic but does not take into consideration the potential impact of the pandemic on real estate values. The medium to long-term effects of the pandemic on real estate values are unknown at this time, adding a level of uncertainty regarding the fair value of investment property as reported in these financial statements. Based on the information now available, management believes that the appraised value appropriately reflects the fair value of the investment property.

This investment property has been classified as Level 3 in the fair value measurement hierarchy and there were no transfers from or to Level 3 during the period. The fair value of the investment property reflects the current market conditions and is based on the appraised value using the sales comparison approach where the average sales price approximated \$1,150,000 per acre.

Under the sales comparison approach, fair value is estimated using the assumption that title to the property is good and marketable and clear of any or all liens or encumbrances. All engineering is assumed to be correct and that there are no hidden or unapparent conditions of the property, subsoil or structures that render it more or less valuable. It is assumed that all applicable zoning, regulations and restrictions have been complied with and that the utilization of the land and improvements is within the boundaries or property lines of the property described and that there is no trespass or encroachment.

9. Other assets

	2020	2019	
Accrued interest receivable on securities and			
note receivable (Notes 6 and 12)	\$ 2,508,666 \$	2,709,033	
Prepaid assets	6,104,361	4,893,206	
Cheques and other items in transit	768,814	870,100	
Accounts receivable	1,391,551	1,548,079	
Other assets	623,607	662,060	
	\$ 11,396,999 \$	10,682,478	

As at June 30, 2020, included in other assets is the Bank's investment in the Bahamas Automated Clearing House Limited in the amount of \$ 208,453 (2019: \$212,944). Also included in Clearing and other items in transit is a debit balance for BSD cheque clearing of \$482,277 (2019: \$309,347) with allowance for unresolved items of \$133,401 (2019: Nil).

Depreciation (Note 21)	-	65,740	427,033	492,773
Disposal/write-off	-	-	(167,078)	(167,078)
Balance as at June 30, 2020	\$ 734,840 \$	5,786,038 \$	9,213,976 \$	15,734,854
Net book value:				
Balance as at June 30, 2020	\$ 429,520 \$	149,025 \$	5,521,094 \$	6,099,639
Balance as at June 30, 2019	\$ 429,520 \$	214,765 \$	4,124,697 \$	4,768,982

Land in the amount of \$44,565 (2019: \$44,565) is included in land and building.

Leasehold Improvements and Furniture, Fixtures and Equipment include work in progress, on which no depreciation has been charged, in the amount of \$2,729,060 (2019: \$3,333,928).

There is still uncertainty over how the COVID-19 pandemic will impact the Bank's property and equipment. Based on the information now available, management believes that the land stated at cost, building and other fixed assets net of depreciation appropriately reflect the net book value of the Bank's property and equipment.

At end of year	\$ 5,313,347 \$	2,453,615

Computer software includes work in progress, in the amount of \$1,448,624 (2019: \$1,736,063) on which no amortisation has been charged.

12. Notes receivable, net and special retained earnings

During October 2014, the Government created a special purpose vehicle, Bahamas Resolve Limited ("Resolve"), that is owned and controlled by the Government. At that time, the Bank sold to Resolve certain of its non-performing loans with a face value of \$100.0 million and a net book value of approximately \$45.4 million in consideration for \$100.0 million in unsecured promissory notes (the "Notes"). The difference of approximately \$54.6 million between the Notes received and net book value of the assets sold was recognized directly in equity as Special Retained Earnings. The Notes which had a final maturity of October 30, 2024 were redeemed during the financial year ended June 30, 2018.

Also during the financial year ended June 30, 2018, the Bank sold to Resolve another portfolio of non-performing loans with aggregate face value of \$134.5 million and net book value of approximately \$50.6 million, together with accrued (but suspended) interest on the loans of \$33.2 million, in consideration for an unsecured promissory in the amount of \$167.7 million. The difference between the promissory note received and the net book value of the loans and accrued interest transferred to Resolve, amounting to approximately \$117.1 million, was credited to Special Retained Earnings. An additional \$0.4 million in fees and charges were recognized in Special Retained Earnings. The promissory note with final maturity date of August 31, 2022 bears fixed interest at 3.5%, payable semi-annually on the 28th day of February and the 31st day of August, commenced in August 2018. As at June 30, 2020, accrued interest receivable amounts to \$1,956,500 (2019: \$1,956,500).

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

12. Notes receivable, net and special retained earnings (continued)

The Bank has transferred all of its rights relating to the non-performing loans to Resolve and will have no rights to future cash flows from the non-performing loans. Resolve, and not the Bank, will bear all the risks and rewards of the non-performing loans subsequent to the transaction and Resolve, and not the Bank, will control the non-performing loans. The Bank will not have any continuing involvement in servicing the non-performing loans, and the Bank's only rights will relate to the cash flows associated with the promissory note. Further, the Bank will not be providing any form of future direct or indirect financing to the customers whose loans were transferred to Resolve, and these customers will no longer be customers of the Bank.

As a part of the transaction, the Bank received an irrevocable Letter of Support from the Government. The Letter of Support pledged the Government's support of Resolve to enable it to satisfy its obligations under the promissory note and confirms that, in the event of default by Resolve, the Bank can seek to recover outstanding balances from the Government.

		2020	2019
Note receivable	\$	167,700,000 \$	167,700,000
Allowance for impairment loss (Notes 21, 30)	*	(4,896,589)	(73,500)
	\$	162,803,411 \$	167,626,500

As at June 30, 2020, the allowance for impairment loss significantly increased as the ECL estimates and assumptions considered the impact of the COVID-19 pandemic. Management used its judgement in the assessment of significant increase in risk and migration of balances to progressive stages as exposures related to government deteriorated from Stage 1 to Stage 2 at higher PD (Note 30).

13. Deposits from customers and banks

Preference shares

The Bank's shareholders approved resolutions to increase the authorized share capital of the Bank and allow the issuance of non-voting cumulative preference shares, redeemable at the discretion of the Board of Directors. On June 30, 2006 and during May 7, 2009 the Bank issued a total of B\$15,000,000 and B\$20,000,000 in redeemable preference shares at a rate of 2.00% and 2.50% above the Bahamian dollar prime rate. In accordance with International Financial Reporting Standards, the preference shares were classified as equity. Costs totaling \$235,010 and \$349,000 related to the preference share offering respectively were netted against the proceeds.

From fiscal years 2014 to 2017, the Bank redeemed \$3,400,000 of preference shares annually and \$6,150,000 by fiscal year 2018, with the final redemption of \$15,250,000 during fiscal year 2019.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

15. Share capital (continued)

Voting common shares

Effective January 2006, the Bank had a rights offering resulting in the increase in voting common shares from \$12,000,000 to \$15,600,000 and share premium from \$7,589,064 to \$28,587,866.

On April 15, 2016, the Bank's shareholders approved the reclassification of the authorized and unissued preference shares of the Bank comprising 80,000 shares having a par value of \$1,000 per share into 80,000,000 voting common shares having a par value of \$1.00 per share. The total authorized capital of the Bank remained unchanged at \$160,000,000.

During the period from September 6 - 12, 2016, the Bank entered into a common shares' rights offering for an aggregate amount of \$40 million for 14,814,814 voting common shares. For each 1.44 common shares held as at record date of September 5, 2016, shareholders had the right to purchase an additional 1 share. At the end of the offer period, the Government subscribed for the majority of the offering, and the Bank issued a total of \$39,517,333 in voting common shares to its shareholders at a price of \$2.70 per share. Costs totaling \$482,667 related to this common share offering were netted against the proceeds and resulted in additional share premium of \$24,702,519.

During the period December 31, 2016 to February 28, 2017, the Bank offered a private placement of \$30 million at 3.125% Fixed Rate Perpetual Contingent Convertible Bonds to accredited investors only. This private placement was offered in three tranches of \$10 million each. As at December 31, 2016, the first tranche was subscribed by and issued to the Government. Effective June 30, 2017, this bond in the amount of \$10 million was converted to 6,756,756 voting common shares at a price of \$1.48 per share which resulted in additional share premium of \$3,243,244.

Non-voting common shares

During 2013, the Bank's shareholders approved resolutions to increase the authorized share capital of the Bank and allow for the issuance of a separate class of B\$10,000,000 non-voting common shares. On June 28, 2013 the Bank issued a total of 6,022,945 Class B non-voting common shares to its major shareholder at a share price of \$5.23. Costs totaling \$60,300 related to this common share offering were netted against the proceeds and resulted in additional share premium of \$25,416,755.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

16. Treasury shares

During each of the fiscal years 2011 and 2013, the Bank's Board of Directors approved the repurchase of \$750,000 of the Bank's own shares. The implementation of the share repurchase plan was a strategy to enhance the shareholder value of then existing shareholders. There have not been any repurchase of shares since fiscal 2013.

The balance in treasury shares at year end is as follows:

	No. of Shares	Value

Depreciation and amortisation	849,008	703,314		
Total operating expenses	\$ 32,907,165	\$ 35,997,585		

Provision for impairment losses are as follows:

		2019		
Note receivable (Notes 12, 24)	\$	4,823,089	\$	-
Investment securities (Notes 6, 24)		1,459,948		-
Money market placements (Note 5)		33,088		-
Total provision for impairment losses	\$	6,316,125	\$	-

As at June 30, 2020, the Bank recorded provision for impairment losses as the ECL estimates and assumptions were directly affected by the COVID-19 pandemic. Management used its judgement in the assessment of significant increase in risk and migration of balances to progressive stages as the result of the pandemic, sovereign and corporate exposures deteriorated from Stage 1 to Stage 2 at higher PD (Note 30).

22. Contingencies

To meet the financial needs of customers, the Bank enters into various irrevocable commitments and contingent liabilities. These consist of financial guarantees, letters of credit and other undrawn commitments to lend. Letters of credit and guarantees (including standby letters of credit) commit the Bank to make payments on behalf of customers in the event of a specific act.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

22. Continued)

Legal claims

Litigation is a common occurrence in the banking industry due to the nature of the business undertaken. As a result of the litigation risk inherent in its operations, the Bank is involved in various litigation proceedings in the ordinary course of its business. The Bank has internal and external legal counsel, and formal controls and policies for managing legal claims. With the benefit of professional legal advice, the Bank makes adjustments to account for any adverse effects which the claims may have on its financial standing and/or discloses amounts in accordance with its accounting policies.

As at year end, the Bank had several unresolved legal claims. Various legal proceedings are pending that challenge certain actions of the Bank. Most of these proceedings are loan-related and are reactions to steps taken by the Bank to collect delinquent loans and enforce its rights against collateral securing such loans. In prior year, the Bank was made aware of a significant legal claim against the Bank in respect of a judgment in default and related damages of approximately \$6 million plus interest and cost for which the Bank recorded provision as at June 30, 2019. The Bank has filed the necessary applications to set aside the default judgment and to set aside the said damages. The Bank has also filed papers to stay the enforcement of damages and in certain circumstances to strike out enforcement steps. During the year, the Bank was successful in having the judgement in default of defense set aside. As at June 30, 2020, the Bank maintained the related provision recorded since prior year while the ruling on the plaintiff's appeal is pending. Management considers that adequate provision has been made in these consolidated financial statements, included in other administrative expenses (Note 21) and accounts payable (Note 14), for any loss that might ultimately be determined.

23. Commitments

The approximate minimum rental commitments (exclusive of the effect of escalation clauses relating to taxes, maintenance, etc.) under operating leases for the years ended June 30, 2020 and 2019 are as follows:

	2020	2019	
No later than 1 year	\$ 473,467	\$	566,398
Later than 1 year and no later than 5 years	648,006		335,366
Total	\$ 1,121,473	\$	901,764

The commitments for loans and advances at June 30, 2020 were \$5,666,460 (2019: \$4,598,154).

The Bank has a commitment for future capital expenditure of \$2,142,694 (2019: \$5,351,405).

The Bank has letters of credit and guarantees outstanding of \$3,475,019 (2019: \$3,439,122).

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

24. Transactions and balances with related parties

All loans to related parties are extended in the regular course of business; allowance for impairment loss against any of these balances as at June 30, 2020 amounted to \$7,942,329 (2019: \$133,396).

25. Employee benefits

The Bank has a defined contribution plan (the "Plan") in which eligible employees (those having attained 18 years of age and employed on a full-time basis for a continuous period of twelve months) contribute a minimum of 3.50% of their annual salaries and the Bank contributes 6.50%. Employees become fully vested after 5 years of plan membership. The plan assets are managed by an independent third-party investment manager. Contributions for the year ended June 30, 2020 totaled \$700,568 (2019: \$569,191) recorded as staff costs (Note 21).

In the prior year, the Plan revised its investment strategy and fully employed a low risk and conservative bond fund.

As at June 30, 2020, the Plan has deposits totaling \$421 (2019: \$104,852) with the Bank.

The assets of the Plan are managed by Trustees that are independent of the Bank.

26. Assets under administration

The Bank has assets under administration for clients in the Bank's fiduciary capacity as follows:

	2020	2019
Government guaranteed student education loans	\$ -	\$ 56,899,718
Government guaranteed hurricane relief loans	\$ 15,413,355	\$ 24,177,971
Trust assets	\$ -	\$ 102,912,472

The Bank recognised fees totaling \$23,521 (2019: \$162,442) for the administration of the Government Guaranteed Student Loans program and \$543,686 (2019: \$844,248) for the administration of the Government Guaranteed Hurricane Relief Loans program.

The Bank's strategic plan included the sale of its trust operations, Bank of the Bahamas Trust Ltd. (the "Trust"), 100% owned subsidiary. On May 21, 2019, the Bank's Board of Directors approved the sale of the Trust portfolio of assets under administration ("Trust's assets") to Leno Corporate Services Limited ("Leno"). On July 31, 2019, the Bank signed the agreement for the sale of its Trust assets to Leno for the amount of \$561,717, which was subsequently adjusted to \$541,717. Following regulatory approvals, the sale closed on October 31, 2020. This transaction met the IFRS 5 Non-current Assets Held for Sale and Discontinued Operations definition of discontinued operations as the Trust is a component of the Bank that has been disposed of and represents a separate major line of business. As a result of the sale, the Bank recorded \$541,717 as other operating income and included in the Consolidated Statement of Comprehensive Income for the year ended June 30, 2020 is the Net Loss for the year from Continuing Operations amounting to \$7,815,958 and the Net Gain for the year from Discontinued Operations amounting to \$512,752.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

26. Assets under administration (continued)

Results of discountinued operations:

	2020	2019
Trust revenue, net	\$ 2,725 \$	137,124
Operating expenses	(31,690)	(112,320)
Results from operating activities	(28,965)	24,804
Gain on sale of Trust assets	541,717	
Gain from discontinued operations	\$ 512,752 \$	24,804

Cashflows from discontinued operations:

	2020	2019

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

27. Dividends and earnings per share

Dividends to the Bank's shareholders are recognised as a liability in the period in which they are declared by the Board of Directors and approved by the Bank's Regulator. In December 2018, outstanding dividends on preference shares of \$1,546,250 were declared and paid, while the remaining outstanding dividends on preference shares of \$1,634,802 were declared as at March 31, 2019 and fully paid in May 2019. The Bank paid no dividends to common shareholders during the reporting years.

	2020	2019
Net (loss)/income attributable to equity shareholders	\$ (7,303,206) \$	2,910,259
Preference share dividends	-	(3,181,052)
Net loss attributable to ordinary shareholders	\$ (7,303,206) \$	(270,793)
Weighted average number of ordinary shares outstanding	42,959,494	42,959,494
Basic loss per ordinary share	\$ (0.17) \$	(0.01)

28. Fair value of financial assets and liabilities

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The best evidence of fair value is quoted price in an active market.

IFRS 13 requires that the classification of financial instruments at fair value be determined by reference to the source of inputs used to derive the fair value. This classification uses the following three-level hierarchy:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities
 that the entity can access at the measurement date. This level includes listed equity
 securities and debt instruments on exchanges.
- Level 2 Valuation techniques based on observable inputs, either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3 Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

28. Fair value of financial assets and liabilities (continued)

As of June 30, 2020, the Bank held equity securities as FVOCI totaling \$3,044,359 (2019: \$2,735,148) classified as Level 1 investment. No transfers were made during the year for any investments between the hierarchies. Investment property has been classified as Level 3 (Note 8).

The following methods and assumptions have been used in determining fair value. There is still uncertainty over how the COVID-19 pandemic will impact the fair value of the Bank's assets and liabilities. Based on the information now available, management believes that assets and liabilities appropriately reflect fair value.

Cash and cash equivalents, other assets and other liabilities

Due to their short-term maturity, the carrying values of these financial instruments approximate their fair values.

Investment securities

The estimated fair values of the Bank's investments are determined based on quoted market prices, when available. If quoted market prices are not available, management's best estimate of the fair value is based on significant market observable inputs disclosed in Note 6.

Loan and advances to customers

Loans and advances to customers bear interest at floating rates tied to the Bahamian dollar prime rate and are therefore subject to re-pricing within a short period of time. As such, fair values are assumed to be equal to their carrying values and are disclosed in Note 7.

Deposits from customers

The estimated fair values of deposits from customers were determined by valuing the deposits based on current market interest rates relative to the Bank's interest rates. The fair values of deposit from customers approximate their carrying values.

Investment property

The fair value of investment property was determined by external, independent property valuers, having appropriate recognized professional qualifications and recent experience in the location and category of the property being valued. The independent valuers provide the fair values of the Bank's investment property portfolio every three years.

The fair value measurements for all of the investment properties have been categorized as Level 3 fair value measurements. The valuation model used is the Sales Comparison Approach to estimate the Market Value of the subject site. The model considered three comparable transactions which were adjusted for the sales price for differences in location and size.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

29. Regulatory capital

The Central Bank requires that the Bank maintains a ratio of total regulatory capital to risk-weighted assets at a minimum of 18%. The Bank's regulatory capital ratio for 2020 was 38.2% (2019: 42.4%). Regulatory capital consists of Tier 1 and Tier 2 capital. Total Tier 1 capital comprises of Common Equity Tier 1 ("CET 1"). CET1 ratio must be at least 9.6% of the total Risk Weighted Assets. The Bank is in compliance with this capital requirement at 37.5% as at June 30, 2020 (2019: 41.8%).

Capital regulatory requirements for subsidiary companies are managed through the Bank. The Bank's strategy is unchanged from 2019. The Bank maintains an actively managed capital base to cover risks inherent in the business. The adequacy of the Bank's capital is monitored using, among other measures, the rules and ratios established by The Central Bank. As at June 30, 2020, the Bank was compliant with all of the externally imposed capital ratio requirements.

Capital risk management

The primary objectives of the Bank's capital management are to comply with externally imposed capital requirements, maintain strong capital ratios to support its business and to maximize shareholders' value.

The Bank typically manages its capital structure and adjusts it in the light of changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Bank may adjust the amount of dividend payment to shareholders, return capital to shareholders or issue capital securities.

The capital structure is designed to provide optimal risk absorption consistent with the risk profile of the Bank's consolidated statement of financial position. The capital mix is intended to maximize the return for shareholders. The Bank utilizes equity issuances to achieve an ideal capital structure.

At June 30, 2020 and 2019, the capital structure of the Bank consists of equity held by common shareholders, including issued capital, share premium, special retained earnings and accumulated deficit. Ongoing capital management includes the payment of dividends, common share issuances, maintenance of reserves and special retained earnings.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

30. Risk management

There are a number of risks inherent in banking that the Bank manages on an ongoing basis. Among these risks, the more significant are credit, operational, currency, liquidity, capital and interest rate risks.

Credit risk

Credit risk arises from the failure of a counterparty to perform according to the terms of the contract. From this perspective, the Bank's significant exposure to credit risk is primarily concentrated in cash and due from banks, investments, notes receivable and loans. Cash, due from banks and investments are predominantly in Bahamian and United States dollars and have been placed with high quality institutions. The Bank maintains deposits in foreign currencies with top rated correspondent banks in the United States, Canada and the United Kingdom.

The Bank evaluates the concentration of risk with respect to the note receivable as low, as the interest and principal sum is payable by Bahamas Resolve Limited ("Resolve"), which is a company wholly owned and controlled by the Government. Accordingly, the Bank evaluates the concentration of risk with respect to the Government loan as low, as the interest and principal sum are payable by the Government. An impairment analysis is performed at each reporting date by assessing the Government's ability to make the interest payments due on the Note, given that the Government has undertaken to support Resolve, as more fully described in Note 12.

Credit risk arising from loans is mitigated through the employment of a credit risk management regime that sets limits for sector concentration, as well as single and related party exposure. The Board of Directors approves credit granting limits. In addition, the credit policies provide for credit facilities to be reviewed regularly by the Bank's credit risk management department, internal audit department and annual review by credit officers. Most of the Bank's loans are collateralized and guaranteed, thus providing further mitigation of credit risk.

The Bank assesses credit exposure on loans by utilizing risk ratings. The ratings are categorized into a variety of segments such as minimal risk, moderate risk, high risk and non-performing. The purpose of credit rating is to provide a simple, but effective and ongoing system of credit risk gradation by which relative credit worthiness of borrowers may be identified and accordingly the level of credit enhancements, degree of monitoring, frequency of reviews, level of provisioning, and pricing can be determined. The credit rating would reflect both the likelihood of default and the potential extent of loss given default.

The credit worthiness of most borrowers is not constant over time. For this reason, changes in ratings must reflect changes in the relative strength of the borrowers and in their obligations. Appropriate credit ratings must be assigned to every borrowing relationship. A rating must be assigned at the time of credit extension and reviewed and updated in each periodic review or if the situation warrants a change at any other time.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

30. Risk management (continued)

Credit risk (continued)

A rating change highlights a change in the credit worthiness or corrects a previous rating that did not fully reflect the quality of the credit. Because of their very nature, changes are to be expected more frequently among credits with lower ratings than among credits of higher ratings. Typically loans within the retail credit portfolio which are performing are not assessed for changes in ratings, unless the customer approaches the Bank for additional credit.

The assigning of a risk rating calls for professional judgment and can involve subjective elements. When a credit rating is assigned, all relevant information concerning the risk profile of the borrower is considered, including but not limited to, industry trends, economic climate, business environment and earnings track record. Consideration is given to much less quantifiable items such as opinion of management, perception of trustworthiness and character, hidden reserves and other factors.

The Bank conducts an impairment assessment on each of its loans. The main considerations for the loan impairment assessment include whether any payments of principal or interest are overdue or there are any known difficulties in the cash flows of counterparties, credit rating downgrades, or infringement of the original terms of the contract. The Bank addresses impairment on an individual and portfolio basis. In managing credit risk, the Bank takes a holistic approach in assessing its impact and implications from a regulatory standpoint and potential consequences for liquidity and its capital.

Concentration of risks and financial assets with credit risk exposure are as follows:

In (\$000s)	2020	2019
Cash, cash equivalents and due from banks (Note 5)		
Neither past due nor impaired	\$ 206,112	\$ 181,128
Investment securities (Note 6)		
Neither past due nor impaired	\$ 51,002	\$ 100,836
Loans and advances to customers (Note 7)		
Neither past due nor impaired	\$ 325,685	\$ 280,991
Past due but not impaired	26,129	35,889
Impaired	83,894	87,332
	\$ 435,708	\$ 404,212
Note receivable (Note 12)		
Neither past due nor impaired	\$ 167,700	\$ 167,700

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

30. Risk management (continued)

Credit risk (continued)

Financial assets are past due when a counterparty has failed to make a payment when contractually due.

Expected Credit Loss Measurement

ECL is measured on either a 12-month (12M) or Lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of probability of default (PD), exposure at default (EAD), and loss given default (LGD), defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation, either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For example, for a revolving commitment, the Bank includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.
- LGD represents the Bank's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD). LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The ECL is determined by projecting the PD, LGD and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e. the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The Lifetime PD is developed by applying a maturity profile to the current 12M PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis.

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

30. Risk management (continued)

Credit risk (continued)

Expected Credit Loss Measurement (continued)

The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type. The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. These vary by product type.

The Bank uses a Point-in-Time ("PIT") analysis while having regard to historical loss data and forward looking macro-economic data.

Incorporation of forward-looking information

The Bank incorporates forward-looking information into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL. The Bank has performed historical analysis and identified the key economic variables impacting credit risk d expected credit losses for each portfolio. The Bank formulates three economic scenarios (base case, best case and worst case). Once an ECL calculation has been developed for each scenario, a weight is applied to each estimate based on the likelihood of occurrence to arrive at a final weighted ECL.

The weighting assigned to each economic scenario as at June 30, 2020 was as follows:

			Downside
	Base scenario	Upside scenario	scenario
Sovereign exposures (Investments and Note Receivable)	85.00%	8.00%	7.00%
Loans and advances to customers	85.00%	8.00%	7.00%

The weighting assigned to each economic scenario as at June 30, 2019 was as follows:

			Downside
	Base scenario	Upside scenario	scenario
Sovereign exposures (Investments and Notes Receivable)	80.00%	10.00%	10.00%
Loans and advances to customers	80.00%	9.78%	10.22%

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

30. Risk management (continued)

Credit risk (continued)

Maximum Exposure to Credit Risk

For financial assets recognised on the consolidated statement of financial position, the exposure to credit risk equals their carrying amount. For standby letters of credit, the maximum exposure to credit risk is the maximum amount that the Bank would have to pay if the standby letters of credit are called upon. For mortgage commitments and revolving credit lines that are irrevocable over the life of the respective facilities, the maximum exposure to credit risk is the full amount of the committed facilities. The following table contains an analysis of the credit risk exposure of financial assets for which an ECL allowance is recognised. The gross carrying amount of the financial assets represents the Bank's maximum exposure to the credit risk of these assets.

								Total		Total
	9	Stage 1		Stage 2		Stage 3		2020		2019
Loans and accrued interest receivable	\$ 26	61,687,414	\$	91,402,325	\$	83,361,222	\$	436,450,961	\$	402,575,295

Investment securities	\$	-	\$	47,957,388	\$	-	\$	47,957,388	\$	98,101,320

Transfers between Stages

At each reporting date, the Bank assesses whether the credit risk on its financial assets has increased significantly since initial recognition. The assessment of whether an asset is in Stage 1 or 2 considers the relative change in the probability of default occurring over the expected life of the instrument and is not assessed based on the change in the amount of the expected credit losses. This involves setting quantitative tests combined with additional indicators such as credit risk classification and other observable inputs.

Transfers between Stages 1 and 2 are based on the assessment of significant increases in credit risk relative to initial recognition. The impact of moving from 12-month expected credit losses to lifetime expected credit losses, or vice versa, varies by portfolio and is dependent on the expected remaining life at the date of the transfer. Stage transfers may result in significant fluctuations in the Bank's expected credit losses.

Movement in Impairment Allowances by Stage

The impairment allowance recognised in the period is impacted by a variety of factors, including but not limited to:

• Transfers between Stage 1 and 2 or 3 due to financial assets experiencing significant increases (or decreases) of credit risk or becoming credit-impaired in the period, and the consequent "step up" (or "step down") between 12-month and lifetime ECL;

Notes to Consolidated Financial Statements

Year ended June 30, 2020 (Expressed in Bahamian Dollars)

30. Risk management (continued)

Credit risk (continued)

- Additional allowances for new financial assets recognised during the period, as well as releases for financial assets derecognised in the period;
- Impact on the measurement of ECL due to changes in PDs, EADs, and LGDs in the period, arising from regular refreshing of inputs to the model;
- Impacts on the measurement of ECL due to changes made to models and assumptions; and
- Financial assets derecognised during the period and write-offs of allowances related to the assets that were written off during the period.

The following table explains the changes in the impairment allowance by portfolio between the beginning and the end of the annual period due to these factors.

ECL sensitivity analysis

Set out below are changes to the Bank's ECL as at June 30, 2020 and 2019 that would result from reasonably possible changes in these parameters from the actual assumptions used by the Bank as key ECL drivers.

		2020 ECL Impact of						
	Change in	Change in Increase in Decrease i						
Collateral haircut	threshold	ECL allowance	ECL allowance					
Loans and advances to customers	(+/- 5)%	3,697,156	3,445,750					

		2019 ECL Impact of						
	Change in Increase in Decreas							
Collateral haircut	threshold	ECL allowance	ECL allowance					
Loans and advances to customers	(+/- 5)%	3,731,660	3,524,943					

COVID-19 impact

The COVID-19 pandemic significantly impacted the Bank's economic outlook, which has a high degree of uncertainty given the evolving environment. The provision for loan losses reflects the Bank's economic outlook as at June 30, 2020. Subsequent changes to these forecast and related estimates will be reflected in the provision for loan losses in future periods. The base scenario reflects a sharp decline in economic activity during the last quarter followed by a partial recovery subsequent to the Bank's fiscal year end.

The following provides additional detail about the Bank's forecasts for certain key macroeconomic variables used in the ECL calculation:

- Unemployment rate is at its highest as at June 30, 2020;
- Gross Domestic Product (GDP) hit historical low during the last quarter;
- Moody's downgraded the Bahamas' credit rating to below investment grade;
- Credit portfolio related to the Tourism sector had the most immediate impact of the pandemic.

The Bank has established relief programs to help borrowers manage through challenges of COVID-19 primarily through payment deferrals. During the last quarter of the fiscal year, the Bank temporarily extended the credit terms by up to 90 days for specific customers with liquidity constraints arising as a direct result of the COVID-19 pandemic. In cases where borrowers have opted to participate in payment deferral programs as a result of COVID-19, deferral of payments is not considered past due and such loans are not aged further during the deferral period.

Foreign exchange risk

The Bank holds assets and liabilities denominated in currencies other than Bahamian dollars, the measurement currency of the Bank. Consequently, the Bank is exposed to foreign exchange risk since the values of the assets and liabilities denominated in other currencies will fluctuate due to changes in exchange rates. The Bank manages these positions by matching assets with liabilities wherever possible. The table below summarizes the Bank's exposure to foreign currency exchange risk at June 30, 2020 and 2019. Included in the table are the Bank's financial instruments at carrying amounts, categorized by currency.

Concentrations of currency risk

Operational risk

Operational risk relates to the risk of direct or indirect loss resulting from inadequate or failed internal processes, people and systems or from external events. It is mitigated by documented policies and procedures, staff training and a risk-based internal audit regime.

Interest rate risk

Interest rate risk is the potential for a negative impact on the consolidated statement of financial position and/or consolidated statement of comprehensive income or loss e arising from adverse changes in the value of financial instruments as a result of changes in interest rates.

Interest rate sensitivity or interest rate risk results from differences in the maturities or repricing dates of assets and liabilities. Interest rate risk exposures or "gaps" may produce favorable or unfavorable effects on interest margins depending on the nature of the gap and the direction of interest rate movement and/or the expected volatility of those interest rates. Interest rate gaps are carefully monitored, and scenario tests are performed to determine the potential impact of various gap exposures. When assets have a shorter average maturity than liabilities, an increase in interest rates would have a positive impact on net interest margins, and conversely, if more liabilities than assets mature or are repriced in a particular time interval then a negative impact on net interest margin would result. The consolidated gap position shows more assets than liabilities repriced in periods greater than one year. This is a typical position for a financial institution with a large personal customer base.

The Bank analyses its interest rate exposure on a dynamic basis. Various scenarios are simulated taking into consideration changes in interest rates. Based on these scenarios, the Bank calculates the impact on profit and loss of a defined interest rate shift. For each simulation, the same interest rate shift is used for all currencies. Based on the simulations performed, the impact on net income and consequently shareholders' equity of a 100-basis point shift would be a maximum increase or decrease of \$1.5 million (2019: \$1.7 million).

Liquidity risk

Liquidity risk is the potential for loss if the Bank is unable to meet financial commitments in a timely manner at reasonable prices as they fall due. Financial commitments include liabilities to depositors and suppliers, and lending, pledging and investment commitments. Managing liquidity and funding risk is essential to maintaining both depositor confidence and stability in earnings.

The Bank maintains a portion of its deposits in cash and other liquid assets to mitigate this risk. On a daily basis, the Bank monitors its cash and other liquid assets to check that they sufficiently meet the Bank's requirements. In addition, the Bank performs regular gap analyses showing the maturity exposure arising from the different maturity of assets and liabilities. As is the case throughout the sector, those gap analyses show that the Bank is liability-sensitive in the short term. Regular scenario tests are performed to determine the extent to which the Bank can withstand unforeseen withdrawals and the cost associated with meeting such demands should they arise.

Liquidity risk (continued)

There is still uncertainty over how the COVID-19 pandemic will impact the Bank's liquidity position. However, based on the Bank's liquidity position as at the date of authorization of these consolidated financial statements, management believes that the Bank has sufficient funding to meet its financial obligations.

The following tables summarize the carrying amount of consolidated financial assets and liabilities of the Bank into relevant maturity groupings based on the remaining period at the consolidated statement of financial position date to the contractual maturity date. The actual maturity dates could be significantly different from the amounts in the table.
